

Lora LaRochelle

(207) 656-2516 — larochellelora@gmail.com — LinkedIn — GitHub

Education

Brown University Providence, Rhode Island
Ph.D. in Biostatistics Expected 2031

Colby College Waterville, Maine
B.A. in Mathematics and Statistics, Minor in Computer Science May 2026
Cumulative GPA: 4.02/4.33; Department GPA: 4.06/4.33
Magna Cum Laude; Dean's List (All Semesters)

Advanced Studies in England Bath and Oxford, United Kingdom
Abroad Semester, Humanities Spring 2025

Research Experience

Yale University New Haven, Connecticut
Research Fellow, BDSY (SIBS) Participant June 2025 – July 2025

- Collaborated on a research project mentored by Dr. Stephanie Perniciaro and Shelby Golden, M.S., modeling pneumococcal disease in Nepal using time series analysis, Bayesian hierarchical modeling, and machine learning via association rule mining.
- Presented results at a final symposium through both a poster and oral presentation.
- Completed advanced training in clinical trial design, causal inference, Bayesian methods, machine learning, data equity, and applications of statistics and AI/ML to healthcare, genetics, and epidemiology.

Gulf of Maine Research Institute Portland, Maine
Research Fellow, REU Participant June 2024 – August 2024

- Conducted an independent research project under the mentorship of Dr. Katherine Mills in the Integrated Systems Ecology Lab.
- Analyzed changes in the relationship between fish length and weight and modeled resulting effects on population dynamics using statistical ecology methods.
- Presented findings in a 15-minute symposium presentation.
- Completed training in R, science communication, and research ethics.

Co-Author and Historical Research Assistant September 2018 – May 2024

- Assisted in developing a multi-volume history of the fishing village of Phippsburg, Maine.
- Conducted archival research using deeds, vital records, newspaper archives, yearbooks, and cemetery records, and interviewed descendants of past residents.
- Synthesized findings into five self-published books exceeding 250 pages each.

Publications and Technical Reports

LaRochelle, L., DiFiore, B., Barajas, M., & Mills, K. E. (2025). *Measuring and modeling changes in fish condition in the Northeast U.S. Shelf Marine Ecosystem*. GMRI Technical Report.

Teaching Experience

Colby College

Waterville, Maine

- Teaching Assistant, Topics in Epidemiology (Spring 2026)
- Teaching Assistant, Topics in Statistical Inference (Spring 2026)
- Teaching Assistant, Probability (Fall 2025)
- Teaching Assistant, Introduction to Statistics and Data Science (Spring 2024, Fall 2024, Fall 2025, Spring 2026)
- Teaching Assistant, Series and Multivariable Calculus (Fall 2024)
- Teaching Assistant, Linear Algebra (Fall 2023, Spring 2024)

Responsibilities included grading, tutoring, leading office hours, attending classes to take official course notes and actively support student learning, and providing instructional support across statistics and mathematics courses.

Leadership Experience

President, Women in Mathematics and Computer Science Club, Colby College

Led planning and execution of meetings and events, including alumni panels, student panels, networking opportunities, and resume workshops.

Service and Outreach

- Math Mules Program, Colby College (K–12 mathematics outreach)
- Maine College Circle (college access outreach)

Honors and Awards

Awards

- Homer T. (Pete) Hayslett Prize in Statistics (\$200)
- Integral Award in Mathematics (\$200)
- Thomas R. Berger Travel Award (\$1,300)

Honors

- Phi Beta Kappa
- Mu Sigma Rho Statistics Honor Society
- Dean's List (all semesters)

Scholarships

- Barowsky Scholar (\$72,000)
- Mitchell Scholar (\$10,000)
- Sibley-Saltonstall Scholar (\$10,000)

Technical Skills

Programming: R, Python, Java, MATLAB, LaTeX, Git/GitHub
